WORK EXPERIENCE

Arcon · Mumbai, India

April 2025 - Present

Software Developer

- Implemented an event-driven auto-onboarding solution for an IAM platform using Kafka-backed microservices, improving onboarding efficiency by 36% and reducing manual configuration time by approximately 30%.
- Developed a secure envelope decryption system for a desktop IAM tool using FastAPI, AES-256, and dynamically derived keys, eliminating hardcoded secrets and reducing security vulnerabilities by around 90%.
- Optimized decryption throughput by utilizing Python multiprocessing queues for parallel decryption, resulting in a 66% reduction in processing time from 6 seconds to 2 seconds for large client envelopes.
- Designed and implemented multi-factor authentication for the Envelope decryption desktop tool, integrating TOTP-based MFA and session authentication to strengthen access security for enterprise client environments by approximately 40%.

CarTrade Tech · Mumbai, India

September 2022 - April 2025

Software Development Engineer 1

- Generated bullet points will appear here once the model returns valid data.

PROJECTS

AI Resume Generator

- • Built an AI-powered resume generator that converts raw career data into ATS-optimised resume bullets using Groq's
- LLaMA 3.3 API, with a live preview rendered dynamically into a formatted HTML resume template

TECHNICAL SKILLS

Languages: C++, C#, Python, JavaScript

Frameworks: .NET Core, FastAPI, Electron

Databases: MySQL, Sql Lite, MSSql

Tools: RabbitMQ, Kafka, Git, Uvicorn, Grafana, Memcached

Concepts: Event-Driven Architecture, pub-sub Architecture, Rest API, System Design, HLD, LLD, Encryption, Decryption, AES 256

EDUCATION

BE at Smt. Kashibai Navale college of Engineering, Pune

-

ACHIEVEMENTS

- Solved over 500+ DSA questions across various coding platforms.
