WORK EXPERIENCE

Arcon Mumbai, India
Software Developer April 2025 – Present

- Implemented an **event-driven auto-onboarding solution** for an IAM platform, **Kafka-backed microservices** serialize client configurations into connectors and route them to an execution service, **improving onboarding efficiency by 36%**.
- Built secure **envelope decryption system** for a desktop IAM tool (FastAPI) implementing **AES-256** with **dynamically derived keys and IVs. eliminating hardcoded secrets.**
- Optimised decryption** throughput using **Python multiprocessing queues** for parallel decryption, **reducing envelope processing** time from **6 secs to 2 secs** on large client envelopes.
- Implemented **multi-factor authentication (TOTP-based MFA + session auth)** for the Envelope decryption desktop tool, **strengthening access security** for enterprise client environments.

CarTrade Tech Limited Navi Mumbai, India
Software Development Engineer 1 Apr 2024 - Mar 2025
Associate Software Engineer Sept 2022 - Mar 2024

- Led end-to-end **payment gateway migration from BillDesk to PayU** using .NET Core and gRPC, delivering zero-downtime rollout and **lifting transaction success rate by 40%**.
- Replaced REST with gRPC** across payment microservices, **reducing inter-service latency by 25% under peak load.**
- Implemented **Circuit Breaker pattern (Polly)** for PayU integration, **cutting downstream error volume by 60%** and preventing cascading failures.
- Designed **event-driven refund automation** using **RabbitMQ** and PayU Webhooks, slashing processing time **from 1.5 weeks to 3 days** and **eliminating 84% of manual DB queries — recognized as Developer of the Month.**
- Eliminated XSS vulnerabilities by 90%** via **input sanitization (regex)** and **HTML encoding/decoding**, and prevented SQL injection using **parameterized queries**, securing booking forms and application data flows.

PROJECTS

AI Resume Generator | HTML, React.js, Python, FastAPI, Uvicorn, Groq API (LLaMA 3.3)

- Built an AI-powered resume generator that converts **raw career data into ATS-optimised resume** bullets using **Groq's LLaMA 3.3 API**, with a **live preview** rendered dynamically into a formatted HTML resume template.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, C++, SQL
Frameworks: .NET Core, FastAPI, Node.js, gRPC, Electron
Tools: RabbitMQ, Kafka, Redis, Memcached, Grafana, Git, Postman, Jira
Database Systems: MySQL, MS SQL, Elasticsearch
Concepts: Microservices, Event-Driven Architecture, System Design, HLD, LLD, REST APIs, OOPs, MVC, SOLID Principles, CAP Theorem, Data Structures, Algorithms

EDUCATION

Smt. Kashibai Navale College of Engineering August 2019 - March 2023
B.Tech (Electronics and Telecommunication Engg.)(CGPA of 8.7) Pune, India

ACHIEVEMENTS

- Developer of Month :** Engineered and Automated a **refund process** that **cut processing time by 40%**, Using **Pub-Sub Architecture.**
- Solved over **500+ DSA questions** across various coding platforms.
